*Leading Southwest Georgia into a new economic age.*

---

Crisp County is an ideal choice for the location of your business. We have the infrastructure in place to support your business well into the future. We continue to upgrade the community services so your business can keep up with the demands on doing business in today's global marketplace. We continue to upgrade our fiber networks and T1/DSL service throughout the community in order to provide seamless service to keep your business connected.

Our location along the I-75 and Ga 300 corridor and our competitive electric rates make us an ideal Distribution and Manufacturing location. Our low operating costs and designation as a Federal Rural Empowerment Zone make Crisp County very enticing and affords a total of \$7,000 in job tax credits for each new job created.

Unions are non-existent in Crisp County and our wage rates, though low by National standards, offer our citizens a livable working wage and at the same time allow your business to operate at the lowest costs available in Southwest Georgia.

Manufacturing, distribution and the service industry make up over 60 % of our economy. Agriculture still plays a significant role in the economy as well as the daily life of community and our history is still "rooted" in Agriculture, but our base is diversifying, growing, and changing with the global economics of today.

Our community is a great place to live and raise a family but it's also very conducive to conducting business. Low operating costs, tax incentives and our job tax credits make Crisp County a very profitable place for your business. Give us a call or e-mail us and let us share with you the advantages of doing business here.
